

Power of Us Implementation

Our Scope of Services for Qualified Organizations

FACT SHEET

WhiteRock, a Certified ISV Salesforce Partner, in unison with the Salesforce Power of Us Program, offers substantial discounts for services related to system discovery, design, configuration/development, testing, UAT/QA Services, Report/Dashboard creation, and User Training.

WhiteRock serves customers throughout the US. We support and maintain qualifying nonprofit organizations with Salesforce engineering services related to implementation, integration, and customization that deliver additional value for their constituents, stakeholders, and other interested parties.

To qualify, please review the information below and if there are any questions about the Program, please contact WhiteRock at Learnmore@whiterocktech.net, visit [our website](#), or call our office at: 501.777.8370. Our headquarters is in Little Rock, Arkansas.

WhiteRock Implementation Services

We take great pride in serving and giving back to those we serve with missions in the nonprofit sector. Here are our services:

For Implementation Services:

To include Discovery, Design, Configuration/Development, Testing, Data Migration, Report/Dashboard creation, and Training. These services are estimated at contract. After the Discovery phase is complete, then, if required, an adjustment to contract services might be required if new requirements are learned. Typically, given our experience, we rarely have this requirement executed.

Our services for implementation are \$200/hr of service. For our non-profit organizations, we discount this rate by 25%.

For Custom Development:

If custom code for implementation is required, pricing is by the hour at a discounted rate of \$200 from the base rate of \$300. Custom code is any work requiring 3rd party integration, Apex, Visualforce, or Lightning Components.

For Annual Support:

Annual Support is provided to include Help Desk Support of users, Salesforce upgrade guidance, and changes to configuration that do not include new architecture, database changes, or custom code. In addition, access to our expert team for guidance, governance, and modeling solutions for newly required functionality is included. Rates for Annual Support are 30% of initial implementation fees paid annually. Support renewal is automatically renewed each year without 90 day written notice.
